

# Health Coaching & Motivational Interview Training for clinicians supporting low risk LTC Patients

**Target audience:** Health Care Assistants (HCA), Practice Nurses, Clinical Pharmacists, Social Prescribing Link Workers, Physician Associates, Pharmacy Technicians. (Any suitable roles within the primary care team to support the management of patients with long-term conditions who are identified as low risk.

**Learning outcomes:** Clinicians will receive information about protocols that can be used by HCAs or similar, to contact people with asthma, COPD, type 2 diabetes and cardiovascular disease, who are low risk.

The training will cover the principles of motivational interviewing and health coaching to support local clinicians in their conversations with patients and carers.
